I. General Description

Purpose: To recover the pre-tax return on costs already incurred in connection with the DIP and when construction commences the DIP surcharge will be used to recover the pre-tax return on the construction costs. When the DIP is placed in service, the DIP surcharge will be expanded to recover depreciation, property taxes and prudently and reasonably incurred costs of additional personnel assigned to the operation of the facility. In addition, the DIP surcharge will be used to recover the capital-related costs of the Metz Reservoir construction once the project is placed in service.

Effective: The DIP Surcharge will become effective August 28, 2005.

II. Computation of the DIP Surcharge

Calculation: Until construction commences, the DIP surcharge will be updated annually. After construction commences the DIP surcharge will be updated semi-annually to reflect the construction costs of the preceding six (6) months and will be submitted to Staff forty-five (45) days prior to the effective date.

DIP Surcharge Amount: The charge will be expressed as a percentage carried to two (2) decimal places, and will be applied to the total amount billed to each customer under the Company's applicable rates and charges. The surcharge will be subject to all revenue based taxes.

Formula: The formula for the calculation of the DIP Surcharge is as follows:

$$\text{DIP Surcharge} = \frac{(\text{CE} - \text{AD} - \text{ADIT}) \times \text{ROR} + \text{D} + \text{P} + \text{PT}}{\text{PABR}}$$

Where:

CE	=	Capital Expenditures
AD	=	Accumulated Depreciation
