The following rates include standard line features and the first 2 mile or fraction thereof of the distance between the Customer's local serving central office and the location of the Digital Centrex II service. When that distance is greater than 2 mile, a mileage increment will also apply.

When the Digital Centrex II line extends between different central office building areas, the interoffice mileage schedule will apply in addition to other rates as appropriate. The Customer must select the lowest line size package for the number of lines requested at the time of initial installation (Packages I - VII) or on a subsequent basis (Packages I - VIII). However, Package VIII must be selected for additions up to 99 lines. Any lines remaining in a selected package are not to be considered available for additions.

NOTE 1 For customers with 100 or more lines who order the service on or after December 1, 1989, the Digital Centrex II price will be determined on a Customer specific pricing basis, using incremental costs.

For new Customers with 100 or more lines, a factor of growth and/or reduction in line size, not to exceed 20% of the total lines subscribed to at cut over, may be included in the Customer specific price when requested. A Customer may not exercise a reduction option which would result in less than 100 billable lines.
