GENERAL INFORMATION

43. TRANSMISSION REVENUE ADJUSTMENT

43.1 The Transmission Revenue Adjustment ("TRA") shall be based on a monthly comparison of (1) a forecast based transmission revenue credit that is reflected in delivery rates, and (2) the actual transmission revenue realized, exclusive of revenue taxes imposed thereon.

43.2 Transmission Revenue is defined as (1) wholesale transmission services, excluding congestion rents from Transmission Congestion Contracts (TCCs) and (2) the lease of transmission land in connection with FERC Order 1000 proceedings.

43.3 The forecast based transmission revenue credit reflected in delivery rates is

43.4 The calculation of the Transmission Revenue Adjustment shall be determined on a cost month basis and applied on a two-month lag basis.

43.5 As a result of the monthly comparison of the base transmission revenue credit amount to the actual transmission revenue amount, the TRA determined to be in excess of the base transmission revenue credit amount shall be refunded to customers. The TRA determined to be less than the base transmission revenue credit shall be collected from customers.

43.5.1 In the event that the monthly comparison of base transmission revenue to actual transmission revenue exceeds \$6 million, plus or minus, in any given month, the amount over the \$6 million will be deferred to the next cost month, with a return at the Company's cost of capital. If the \$6 million cap is reached for an additional two consecutive months, the cap will be increased to \$8 million. The \$8 million cap shall remain in place as long as the TRA exceeds +/- \$6 million, including recovery of the deferral and corresponding return, and will revert back to the \$6 million monthly cap once the TRA, including recovery of the deferral and return, falls to less than or equal to +/- \$6 million.

- B. At the sole discretion of the Company, ancillary devices having individually assigned small electric load energy consumption characteristics, authorized as licensed attachments per the terms and conditions of a separate, mutually executed Attachment Agreement, and using single-phase, secondary service voltage sourced directly from the Company's electric distribution system or indirectly using an alternate electric distribution source may be billed unmetered under this rate. Ancillary device unmetered energy consumption, determined as kWh, shall be determined based upon the device manufacturer's specified individual maximum wattage, operating on a constant 24 hour-7 day per week schedule. The billable unmetered energy consumption of devices interconnected to form a complete operating attachment device assembly at a single location shall be determined as the cumulative maximum wattage of all individual devices. Billing of ancillary device service will be assigned to and made the responsibility of the primary customer of record that is obtaining service from the electric distribution system referred to as direct service. The service to an ancillary device or device assembly will require the installation of a Company approved disconnect device and the appropriate electrical circuit grounding. The Company's electric service responsibilities associated with ancillary device service will be consistent with the service quality and reliability provided to outdoor lighting service consistent with the Company's scheduled service response. Unauthorized devices will be considered the responsibility of the primary customer of record from which the service used by the device is provided and shall be managed and/or terminated in compliance with the applicable provisions of the tariff or Attachment Agreement. Unmetered service under this provision may be terminated by any responsible party per the applicable provisions of this tariff or the terms and conditions of the Attachment Agreement provided written notice is issued to all parties no less than 30 days prior to termination.
