COMMUNITY CHOICE AGGREGATION ("CCA") PROGRAM

A CCA Program allows municipalities (villages, towns and cities) to aggregate the usage of eligible CCA customers (residential and small non-residential customers) within a defined jurisdiction in order to secure an alternative energy supply contract on a community-wide basis.

1. In accordance with Order issued in Case 14-M-0224, before requesting customer data from the Company for participation in a CCA Program, the municipality or their designee (CCA Administrator or ESCO) must:

- (a) sign a data security agreement acceptable to the Company, and
- (b) have an approved implementation and data protection plan and certification of local authorization approved by the NYS PSC.

2. Upon fulfilling the requirements (a) and (b) above, the Company will provide the following information to the municipality or their designee in accordance with the terms and fee(s) stated herein.

(a) Aggregated customer data, including the number of customers by service class, the aggregated peak demand (therms) by month for the past 12 months by service class if applicable, and the aggregated energy (therms) by month for the past 12 months by service class. This information will be provided to the municipality or CCA Administrator within twenty days of a request. The Company will notify the requesting party if data for any service class that the Company contains so few customers, or in which one customer makes up a large portion of the load, such that the aggregated information does not pass the relevant aggregation privacy standard. The Company will work with the requestor to revise the request in order to address the identified reason(s) such as expanding the geographic area included in the request or combining customer classes or other means. The charge for the above aggregated data in (a) is included in the CCA Statement.
