**14. Service Guarantees**

The Company guarantees to keep all appointments made at the customer's request as well as special appointments the Company makes with the customer. If the Company does not keep an appointment within the timeframe agreed upon, a refund will be credited to the customer's next bill. The refund will be \$30.00 for residential customers and \$60.00 for non-residential customers.

Service guarantees do not apply to appointments made for the same day the customer requests service or if events beyond the Company's control, such as severe weather, prevent the Company from performing as planned.

However, customers will be charged \$36.44 for an unproductive field visit. This fee will be imposed when a customer makes a future appointment for non-safety related service and the Company has contacted the customer at least twice before at the appointed time, but is unable to provide the service requested because of the customer's culpability. The Company will call the customer two times prior to keeping the appointment, either to confirm the appointment or to reschedule it if intervening events have made keeping it impossible. If a customer is genuinely unable to commit to anything more than best efforts to be available for a service visit on a given day or series of dates will not be considered to have made an appointment to which the charge would apply.

**15. Premium Service Appointments**

At the request of the customer, the Company will provide a Premium Service Appointment (defined below) for non-emergency, non-safety related service appointments such as meter locks and unlocks and meter readings.

The Company will reconnect gas service that has been terminated solely for a violation of this Tariff within 24 hours of a nonresidential customer's request for reconnection and, at the option of the Company, either receipt of adequate notice and documentation, or a field verification that the violation has been corrected. **27.1 ESCO INITIATED SUSPENSIONS - Continued**

3. Upon the receipt of payments from the customer such that the amount paid by the customer to the ESCO, plus the amounts previously paid to the ESCO, plus any charges paid to the Company for distribution service is equal to or greater than the amount the customer would have paid if both natural gas service and local distribution service had been purchased from the Company on a bundled basis during the period the arrears giving rise to the suspension accrued. Using the original delivery service bills for the subject period, the Company will calculate this charge by replacing the transportation adjustment clause with the gas adjustment clause and recalculating appropriate taxes. The Company will prepare for the ESCO such bill calculation for a charge to the ESCO of \$6.89 for each billing period included in the calculation.

**C. Reconnection**

Whenever circumstances beyond the Company's control prevent reconnection of gas service within 24 hours of any of the events specified in this section, gas service shall be reconnected within 24 hours after those circumstances cease to exist.

"MR" is the margin (non-gas) rate. For Service Classification Nos. 2 (Rate Schedule 2), 3, 4B, and 17 (CTS-2 (Rate Schedule 2), CTS-3 and CTS-4B) it equals the unit price of the last block of Service Classification Nos. 2 (Rate Schedule 2), 3 or 4B expressed in \$/Therm. For Service Classification Nos. 1B, 1BR, 1B-DG, 17-CTS-1B and 17-CTS-1BR, "MR" equals a weighted average of the penultimate and last block unit prices, based on consumption in those blocks over the most recent three-year period, expressed in \$/Therm. The margins effective for the weather normalization period will be shown on the Statement of Weather Normalization Adjustment Factors.

"HDD", or Heating Degree Days, are the difference between 65 degrees Fahrenheit (F) and the mean of the extremes of the dry bulb temperature during a day. HDD of a day is always zero when the mean temperature is above 65 degrees F. A heating degree day is each degree of temperature difference. Heating degree days also refer to the cumulative heating degree days experienced over a period of time more than one day.

"NHDD", or Normal Heating Degree Days, for any given calendar day within a month are based on the average of the degree days for that calendar day over the thirty-year period ending December 31, 2021. Normal Heating Degree Days for the weather normalization period will be shown on the Statement of Weather Normalization Adjustment Factors.

"AHDD", or Actual Heating Degree Days, are the actual difference between 65 degrees F and the average of the minimum and maximum outdoor dry bulb temperatures for a particular day. AHDD are always zero when that average is equal to or above 65 degrees F.

## GENERAL INFORMATION - Continued

For existing customers, the Company shall determine increased gas consumption by establishing a monthly base usage pattern at the premises based upon the historical consumption for the 12-month period immediately preceding the customer's receipt of its initial EJP Certificate of Eligibility from the Department of Economic Development. For weather sensitive customers, this monthly base usage pattern will be normalized. Where actual gas usage increases over such base by twenty-five percent in a month, then applicant will be eligible for the benefits of this Rider for that month, and gas usage in excess of the base will be eligible for an EJP rate. For weather sensitive customers, this actual gas usage will be normalized. All monthly gas consumption not meeting the discount qualifications of this Rider shall be billed at the applicable Service Classification rates and charges. For a new customer with no historical usage, the monthly base usage will be considered as zero. EJP Load is load in a given month above the customer's base for that month.

Customers with a Certificate of Eligibility will be eligible to qualify to receive a Certificate of Tax Credit from the State of New York each year which will entitle the customer to receive service at a discounted rate for the following 12-month period commencing with the next full billing period after the utility receives the certificate of tax credit. Service at discounted rates will end no later than fifteen months after receipt of such notification. The Company shall receive a copy of this certificate of tax credit prior to billing the discounted rate.

In addition, qualifying customers must keep their gas account in good standing for the discounted delivery rate to begin and continue.

**57. Demand Capacity Surcharge Mechanism (“DCSM”)**

In Case 19-G-0678, the Commission approved a settlement agreement wherein the Companies agreed to identify potential solutions for addressing the gap between the Companies’ supply of natural gas and the forecast of firm demands of customers. As part of a portfolio of solutions to meet peak demand, the Companies have identified opportunities to implement certain incremental non-infrastructure solutions.

To effectuate the recovery of costs associated with any Commission approved incremental energy efficiency costs not included in base delivery rates, Demand Response program costs, Long-Term Capacity project costs, and Incremental NE:NY budget costs, the Company is permitted to implement a surcharge – the Demand Capacity Surcharge Mechanism – commencing during the 12-month period ending March 31, 2022 in accordance with the Commission Order issued in Case 19-G-0309.

The Demand Capacity Surcharge Mechanism is included in the Delivery Rate Adjustment (“DRA”) for customers served under SC 1, 2, 3, 4A, 4A-CNG, 4B, 7 and 21 firm sales, SC 17 firm transportation, SC22 and 18-22 Non-Firm Demand Response, adjusted for applicable Pre-Tax WACC. Total allocation of costs are as follows:

Demand Response: based on peak sendout (applicable to SC 1, 2, 3, 4A, 4A-CNG, 4B, 7, 17 & 21)

Incremental NE:NY Energy Efficiency: based on total deliveries (applicable to SC 1, 2, 3, 4A, 4A-CNG, 4B, 7, 17, 21, 22 & 18-22)

Long-Term Capacity Projects: based on peak sendout (applicable to SC 1, 2, 3, 4A, 4A-CNG, 4B, 7, 17 & 21)

Incremental energy efficiency costs are allocated to customers served under SC 22 and 18-22. The DCSM will appear on the Statement of Demand Capacity Surcharge Mechanism when the Company is permitted to collect applicable program costs in accordance with the Commission Order issued in Case 19-G-0309. The surcharge will be eliminated on July 1, 2024. Any over or under collections of the DCSM deferral balance through June 30, 2024, would remain on the Company’s books with carrying charges at the pre-tax WACC.

**SERVICE CLASSIFICATION NO. 20 (Continued)****H. VALUE ADDED CHARGE**

The Value Added Charge is a unitized per dekatherm rate, derived from the increase from the Base Year Spark Spread to the Spark Spread in the Test Year. The Value Added Charge is applied to every dekatherm delivered by the Company to the Customer or the Customer's Annual Minimum Bill Obligation, whichever is greater, during the Effective Period.

The Value Added Charge for the Effective Period January 1, 2006 through April 30, 2007 equals the Annual Total Value Added Charge for the Test Year ending November 30, 2005 divided by the number of dekatherms the Company delivered to the Customer during the Test Year. If the Customer does not have twelve months of consumption data for the Test Year, that Customer will be assigned a Value Added Charge equal to the average of all the customers' Value Added Charges within the applicable heat rate tier level.

The Value Added Charge for all Effective Periods beginning May 1, 2007 will be based on the Total Value Added Charge for the Test Year, as adjusted for the Reconciliation Charge, divided by the number of dekatherms the Company delivered to the Customer during the Test Year.

Each year, beginning March 1, 2007, the Company will file the Value Added Charge to become effective May 1 of that year.
