GENERAL TARIFF

PUBLIC TELEPHONE SERVICES

NOTE: Public Telephone Services consist solely of Public Access Lines and Public Access Smart-pay Line Service, as specified in Paragraphs A and B following.

A. PUBLIC ACCESS LINES

1. General

Public Access Lines (PAL) are voice grade individual business exchange lines which provide exchange access from the subscriber's premises to the Company's central office facilities for the purpose of connecting COCOTS (as defined in Paragraph A.3.a following) to the Company's network.

2. Types of PALs and Feature Descriptions

a. Basic Public Access Lines

Basic Public Access Lines (BPAL) are measured service lines arranged for either two way (incoming and outgoing) calling or one way (outgoing) calling.

Lines may also be arranged for Outward Call Screening where facilities permit. This feature is designed to prevent a PAL user from obtaining service through an operator when such service is billed to the calling number. An Automatic Number Identification (ANI) code is transmitted to alert operator and carrier systems that the call is originating from a Public Access Line and may require special handling and billing treatment. However, if an interexchange carrier's facilities are not compatible with the Company's signaling arrangements, directly dialed interLATA calls may be blocked by the carrier.

Incoming service on BPAL may also be equipped with Billed Number Screening. This optional feature is designed to permit operator systems to disallow incoming collect and third number calls to the BPAL line when such calls originate within the continental United States and when such calls are processed through the national data base known as Billing Validation Application (BVA).

In addition to the features described above, Enhanced BPAL blocks access to service access codes 700 and 900. No other blocking options are available for Enhanced BPAL.

(C)(1)

(1) See Attachment Page 1, Paragraph 5, following all pages that are a part of this Section, which sets forth the implementation date as provided for in Section 1 A.13. of this Tariff.

GENERAL TARIFF

PUBLIC TELEPHONE SERVICES

- A. PUBLIC ACCESS LINES (Cont'd)
- 2. Types of PALs and Feature Descriptions (Cont'd)

- b. Limited InterLATA Dialing Public Access Lines

Limited InterLATA Dialing Public Access Line (LIDPAL) is a class of service, where interLATA calling is limited to 0+ calling through the carrier's presubscribed operator service provider (if equipped). Casually dialed interLATA calls, where 10XXX precedes the traditional dialing pattern to identify the carrier of choice, will also be limited to 0+ interLATA calling (10XXX + 0+ area code and seven digit telephone number). LIDPAL offers PAL subscribers a vehicle for allowing interLATA 10XXX access while minimizing exposure to fraud.

This service includes Outward Call Screening, International Direct Distance Dialing (011) Blocking, and Blocking Option 4 features (see Part B of the Product Guide) and will be provided in equal access and adjunct equipped central offices where facilities permit. Billed Number Screening, as described in Paragraph A.2.a preceding, is an option available to LIDPAL.

1
(D)(1)
J

- (1) Limited InterLATA Dialing (LID) is provided through business Public Access Lines to Customer Owned Coin Operated Telephones, or to other registered telephone terminal equipment when not accessed by Customer Owned Coin Operated Telephones.
- (2) Limited InterLATA Dialing is provided as a one or two way measured class of service.
- (3) The Limited InterLATA Dialing class of service will be provided in central offices having equal access capability derived through adjunct equipment where facilities permit.

(1) See Attachment Page 1, Paragraph 5, following all pages that are a part of this Section, which sets forth the implementation date as provided for in Section 1 A.13. of this Tariff.

GENERAL TARIFF

PUBLIC TELEPHONE SERVICES

A. PUBLIC ACCESS LINES (Cont'd)

2. Types of PALs and Feature Descriptions (Cont'd)

- c. Coin Compatible Public Access Line
(Furnished only to present subscribers to this service on the same premises. New installations are not permitted.)

Coin Compatible Public Access Line (CCPAL) service is available in 5ESS and DMS 100 central offices where facilities permit, including recording and billing capability for local band "A" call usage.

To the extent feasible, CCPAL is meant to have the same features as standard Verizon New York Inc. "Dial Tone First" (DTF) coin lines. Following is a summary of the CCPAL standard features:

- (1) Two way measured service - This feature permits both outgoing and incoming service. Calls are timed and rated for initial and overtime periods according to standard Verizon New York Inc. rate schedules.
- (2) Dial Tone First (DTF) - DTF enables customers to dial certain calls without requiring coin deposits, e.g. "911 Emergency Service."
- (3) Outward Call Screening (OCS) - OCS transmits an Automatic Number Identification (ANI) code to alert operator and carrier systems that the call is originating from a CCPAL station and may require special handling and billing treatment.
- (4) Billed Number Screening (BNS) - BNS is designed to permit operator systems to disallow incoming collect and bill to third number calls when such calls originate within the continental United States and when such calls are processed through the national data base known as Billing Validation Application (BVA).
- (5) Coin Rating for CCPAL is at the standard rates for coin lines pursuant to Tariffs P.S.C. No. 16 and PSC NY No. 3--COMMUNICATIONS and Part D of the Product Guide.
- (6) Automated Local Coin Overtime (Pre-Pay) - This feature provides for standard overtime charging on band "A" calls after the initial period.

PUBLIC TELEPHONE SERVICES

A. PUBLIC ACCESS LINES (Cont'd)

2. Types of PALs and Feature Descriptions (Cont'd)

c. Coin Compatible Public Access Line (Cont'd)

(Furnished only to present subscribers to this service on the same premises. New installations are not permitted.)

(7) Coin Signaling (Coin Collect and Coin Return) - Coin signaling is used to control the disposition of the coins held in the station. Coin collect is used when a call has been completed and coin return is used if a no answer or busy condition is encountered.

(8) Standard Recorded Announcements - Utilizes announcements regarding rating and timing of sent-paid calls.

(9) Coin Return of Initial Deposit On Cash Calls Beyond Band "A" - Verizon New York Inc. has an initial band "A" coin rate. For all calls beyond band "A" a coin return signal for the initial deposit is sent and the full initial rate is requested by a standard recorded announcement.

(10) Operator System Coin Control – Verizon New York Inc. operator system can handle 0- and 0+ intraLATA dialing from CCPAL.

(11) DTF coin lines include blocking of the 700 and 900 service access codes. The 976 central office prefix is not blocked. The CCPAL subscriber will be billed the standard business rate for these 976 calls.

d. Line Side Answer Supervision

Line Side Answer Supervision (LSAS) optional feature provides "off-hook" supervisory signals to customer premises equipment of the Public Telephone Service subscriber when the called party answers the call. When a called party on-hook at the end of a call is detected, the reverse battery* is returned to normal indicating that the called party has disconnected from the call. The LSAS feature will permit improved accuracy of COCOT timing of sent paid calls.

(C)

* Reverse Battery may not be provided over fiber facilities and are only available where suitable facilities exist.

PUBLIC TELEPHONE SERVICES

A. PUBLIC ACCESS LINES (Cont'd)

3. Regulations

- a. Customer-owned Coin Operated Telephones (COCOTs) are F.C.C. registered coin-activated telephone sets or coin-activated equipment provided through F.C.C. registered protective circuitry and used by any Payphone Provider. COCOTs may be connected to the Company's network only through Public Telephone Services (as defined in NOTE preceding).
- b. Customer-owned coinless and other telephones, such as credit-card reader telephones, may also be connected to PAL lines at the option of the subscriber.
- c. Coin, coinless and combination coin and coinless telephones may be connected only to PAL individual line business message rate service.
- d. Local usage rates and charges apply as specified in Section 14.3 of this Tariff. Toll message usage and all other regulations governing business individual access lines apply to PAL access lines.
- e. PAL subscribers are liable for all usage and monthly charges incurred on PAL access lines.
- f. PAL lines terminate in Company-provided jacks or interfaces.
- g. Regulations and rates applicable to the End User Common Line charge for multiline business service as provided in Tariff F.C.C. 11 apply to PAL access lines.
- h. PAL access lines and PAL optional features are furnished subject to the availability of facilities.
- i. Other optional features for PALs are furnished at existing tariff rates and charges for business service subject to the availability of facilities. Custom Calling Services are not available for CCPAL.
- j. There is no charge to Customer Owned Coin Operated Telephones for local and intraLATA Directory Assistance calls.

GENERAL TARIFF

PUBLIC TELEPHONE SERVICES

A. PUBLIC ACCESS LINES (Cont'd)

3. Regulations (Cont'd)

k. Public Access Line(s) (PALs) are subject to disconnection, by written order of the Public Service Commission (PSC) staff to the Company, for failure to comply with PSC's Part 650 regulations. The PSC staff will direct the Company to suspend a PAL service when a Customer Owned Coin Operated Telephone (COCOT) has been found to be in non-compliance with PSC regulations. If the violation is corrected during the period allowed by the PSC, the Company will be directed to restore service. A Service Connection Charge, a Line or Port Change Charge and a reduced monthly charge for Temporary Suspension will apply as specified in Section 14.7 of this Tariff. If the violation has not been corrected during the prescribed period, the Company will be directed to disconnect the PAL service. During the suspension period, the Company will only install a new PAL service at the affected site for a different and unaffiliated COCOT subscriber.

l. The initial request for CCPAL in a central office entity will require a 30-day interval to establish service. Subsequent requests will be completed at normal intervals.

m. Line Side Answer Supervision is not compatible with Feature Group "A" service, WATS/Dedicated Toll-Free Service, CCPAL, BCALs 1 and 2, or DID service. It is also not compatible with foreign exchange, remote control office and designated PBX trunks. (C)

n. Line Side Answer Supervision is available in 5ESS and DMS-100 central offices where facilities permit.

4. Rates and Charges

For Rates and Charges, see Section 14.3 of this Tariff.

GENERAL TARIFF

PUBLIC TELEPHONE SERVICES

B. PUBLIC ACCESS SMART-PAY LINE SERVICE

1. General

Public Access Smart-pay Line (PASL) Service is comprised of individual measured business exchange lines with coin or coinless functionality offered to Payphone Providers (PPs) for the purpose of accessing measured services and features provided by the Company. PASLs are furnished from suitably equipped central offices, subject to the availability of facilities.

Four types of PASLs are available to PPs. Certain standard features apply to each depending on the service option selected. For details concerning the four PASL options and the standard features applicable to each, see Paragraph B.4 following.

2. Features

- Automated Local Coin Overtime
- Billed Number Screening (BNS)
- Blocking Service Option 4 (except intraLATA central office prefix 976)
- Coin Return of Initial Deposit on Cash Calls Beyond the Local Calling Area
- Coin Signaling (Coin Collect and Coin Return)
- Dial Tone First (DTF)
- Directory Assistance (DA)
- International Direct Dialed (011) Blocking (IDDB)
- Operator System Coin Control
- Outward Call Screening (OCS)
- Standard Recorded Announcements

3. Feature Descriptions

Automated Local Coin Overtime (Pre-Pay) - provides for standard overtime charging on local calls after the initial period.

Billed Number Screening (BNS) - permits operator systems to disallow incoming collect and bill to third number calls when such calls originate within the continental United States and when such calls are processed through the national data base known as Billing Validation Application (BVA).

Blocking Service Option 4 - see Part B of the Product Guide.

Coin Return of Initial Deposit on Cash Calls Beyond the Local Calling Area - transmits a coin return signal for the initial deposit on all calls beyond the local calling area and the full initial rate is requested by a standard recorded announcement.

PUBLIC TELEPHONE SERVICES

B. PUBLIC ACCESS SMART-PAY LINE SERVICE (Cont'd)

3. Feature Descriptions (Cont'd)

Coin Signaling (Coin Collect and Coin Return) – controls the disposition of the coins held in the Basic Coin Access Line station, i.e., coin collect is used when a call has been completed and coin return is used if a no answer or busy condition is encountered.

Dial Tone First (DTF) - enables customers to dial certain calls without requiring coin deposits, e.g., "911" Emergency Service.

Directory Assistance - see Section 5.B of this tariff.

International Direct Dialed (011) Blocking- provides blocking of international directly dialed calls while allowing for completion of directly dialed domestic calls.

Operator System Coin Control – provides control of 0-, 0+ and 1+ dialing from BCAL stations. Sent –paid interLATA calls from BCAL 1 and 2 stations, if permitted by the Presubscribed Interexchanged Carrier (PIC), will be forwarded to the customer's designated (PIC). Special billing/coin sharing arrangements between the BCAL subscribers and their respective carriers will be necessary.

Outward Call Screening - transmits an Automatic Number Identification (ANI) code to alert operator and carrier systems that the call is originating from a BCAL station and may require special handling and billing treatment.

Standard Recorded Announcements – utilizes announcements regarding rating and timing of sent – paid calls.

4. PASL Options

One – Way Basic Coin Access Line (BCAL 1)

BCAL 1 is a standard DTF coin line which provides only outgoing service with Blocking Service Option 4, BNS, OCS, IDDB, and DA.

Two – Way Basic Coin Access Line (BCAL 2)

BCAL 2 is a standard DTF coin line which provides outgoing and incoming service with Blocking Service Option 4, BNS, OCS, IDDB, and DA.

4. PASL Options (Cont'd)

1

(D)

J

Charge-A-Call Public Access Line (Charge-A-Call)

Charge-A-Call service is a coinless line which provides only outgoing service on an authorized credit card basis with OCS, BNS, and DA. One-Plus (1+) dialing (except 800 and 555) is not permitted.

5. Coin Timing and Rating Applicable to Users of Payphones Connected to BCALs 1 and 2

a. Local calls are timed and rated as follows:

Type Of Call*	Initial Period or Fraction Thereof	Overtime Period or Fraction Thereof
Home Region	3	2
Region-to-Region	1	1
Band A	3	2

b. Toll calls are timed and rated based on the initial period of one minute or fraction thereof and each overtime period of one minute or fraction thereof.

* For definitions and rates, see Tariffs P.S.C. No. 16 and PSC NY No. 3--COMMUNICATIONS and Part D of the Product Guide.

6. Regulations

a. Customer-owned Coin Operated Telephones (COCOTs) are F.C.C. registered coin-activated telephone sets or coin-activated equipment provided through F.C.C. registered protective circuitry and used by any Payphone Provider. COCOTs may be connected to the Company's network only through Public Telephone Services (as defined in NOTE preceding).

b. Customer-owned coinless and other telephones, such as credit-card reader telephones, may also be connected to PASLs at the option of the subscriber.

c. Coin, coinless and combination coin and coinless telephones may be connected only to PASL individual line business message rate service.
