COMMON CARRIER SERVICES

Definitions

1 Definitions

Certain terms used throughout this tariff are defined below.

Add/Drop Multiplexing: A multiplexing function that allows lower level signals to be added or dropped from an Optical Carrier (OC) channel.

Advance Payment: Part or all of a payment required before the start of service.

Authorized User: A person, firm or corporation authorized by the Customer or joint user to be connected to the service of the Customer or joint user,

Bit: The smallest unit of information in the binary system of notation.

Company: BCM and any of its concurring, connecting, or other participating carriers joining in this tariff.

Customer: The person, firm or corporation which orders service pursuant to this tariff and is responsible for the payment of charges and compliance with the Company's regulations.
"Customer" includes joint and authorized users.

Dedicated Access: An arrangement whereby a Customer or other common carrier uses a dedicated private line facility to access the Company's network.

Duplex Service: Service which provides for simultaneous transmission in both directions.

800 Data Base Access Service: The term "800 Data Base Access Service" denotes a toll-free originating Trunkside Access Service using an 8XX Service Access Code (i.e., 800, 822, 833, 844, 955, 866, 877, 888 as available) and is used interchangeably with 800 Data Base Service throughout this Tariff to describe this service.

8XX Service Provider: The term "8XX Service Provider" denotes a telecommunications company including Exchange and Interexchange Carriers, that offer 8XX Service to subscribers.

End Office: The term "end office" denotes the LEC switching system office or serving wire center where Customer station loops are terminated in order to connect them to each other and/or to trunks.

Fiber Optic Cable: A thin filament of glass with a protective outer coating through which a light beam carrying communication signals may be transmitted by means of multiple internal reflections to a receiver, which translates the message.

Leaf No. 7

COMMON CARRIER SERVICES

Individual Case Basis: A service arrangement in which the regulations, rates and charges are developed based on the specific circumstances of the case.

Interexchange Carrier (IXC): A long distance company providing service between LATAs.

Joint User: A person, firm or corporation designated by the Customer as a user of an BCM Service furnished to the Customer and to whom a portion of the charges for the service will be billed under a joint user arrangement.

Kbps: Kilobits per second, denotes thousands of bits per second.

LATA: LATA (Local Access Transport Area) defines the boundary within which most LECs can provide end-to-end service under the Modified Final Judgment under which AT&T divested itself of ownership of most LECs.

LEC: LEC (local exchange company) refers to the dominant, monopoly local exchange carrier in an area also served by the Company, e.g., NYTel.

Mbps: Megabits per second, denotes millions of bits per second.

NYTel: New York Telephone Company and/or Bell Atlantic and/or Verizon New York Inc., as called for by the context.

Node: Any BCM or Customer location that is capable of performing Add/Drop Multiplexing.

OC-n: Optical Carrier-n. A SONET optical signal transmitted at rates of $n \times 51.840$ Mbps.
OC-3 = 155.52 Mbps, OC-12 = 622 Mbps.

Port: A facility, equipment system or subsystem set aside for the sole use of a specific Customer.

Premises: The space occupied by a User in a building or buildings or contiguous property (except railroad rights of way, etc.) not separated by a public street.

Services: The services provided by BCM (the Company) under this tariff.

Shared: A facility, equipment system or subsystem which can be used simultaneously by several Customers.

Signaling Point: The term "Signaling Point" denotes a switch that is capable of supporting SS7 signaling.

Signaling Point of Interconnection: The term "Signaling Point of Interconnection" denotes the Customer-designated location, in the same LATA as the Company STP, where SS7 signaling information is exchanged between BCM and the Customer.

Leaf No. 8

COMMON CARRIER SERVICES

Signaling Transfer Point: The term "Signaling Transfer Point" or "STP" denotes a signaling point which routes and/or transfers signaling messages through the common channel signaling network.

Synchronous Optical Network (SONET): A set of International standards for fiber-based transmission systems. SONET defines standard optical carrier transmission rates and utilizes a modular multiplexing signal approach based on the application of Synchronous Transport Signals.

BCM Communications Service: The term "BCM Communications Service" means any service offered herein.

Type I Circuit: Any circuit, including all electronics, that is carried entirely on the BCM network.

Type II Circuit: Any circuit that is carried partially on the BCM network and partially on the network of another carrier or carriers.

User: An Authorized User, Customer or Joint User at whose Premises the Company furnishes common carrier services under this tariff.
