P.S.C. No. 6 -- Telephone
Local Exchange Services
Effective Date: December 30, 2015

Section 13
Leaf No. 1
Revision: 2
Superseding Revision: 1

SECTION 13 – INTEGRATED PRIME SERVICE^{1,2,3}

(C)

13.1 Description

Integrated Prime Service provides Local Voice Services on a Customer's spare capacity AT&T channelized Static Integrated Network Access (SINA) T1 or Frame Relay T1 access channels. The SINA T1 or Frame Relay T1 access arrangement will include Local Prime Services via Integrated PrimePath Lines and Trunks, Integrated PrimePath NBX analog lines and Integrated Prime Digital Trunks.

- ¹ The Integrated PrimePath NBX service component is not available, either under this tariff section or through any Company Contract Tariff or contract referencing this tariff section, to new or existing Customers who did not have it on order on or before May 1, 2004. Existing term plan Customers with contracts for Integrated PrimePath NBX in effect or on order prior to May 1, 2004 may continue under their existing terms and conditions and may move, add or change stations at their existing locations, but may not add new locations unless otherwise specified in their contracts. Customers with contracts that expired on or before May 1, 2004 will be placed on month to month tariff rates upon the effective date of this tariff, subject to the termination schedule stated below. Customers with contracts that expire after May 1, 2004 will be placed on month to month tariff rates upon the expiration of their existing contract, unless otherwise specified in the contract, subject to (and unless otherwise provided in) the termination schedule stated below. Integrated PrimePath NBX services will be terminated based on the schedule set forth below:
- (T)
- (T)
- A. Customers with contracts that expired on or before May 1, 2004 will have two (2) years from May 1, 2004 to migrate to a different service, as their service will be terminated on that date; .
 - B. Customers with contracts expiring in 2004 or 2005 will have two (2) years from contract expiration to migrate to a different service, as their service will be terminated on that date;.
 - C. Customers with contracts expiring in 2006 will have one (1) year from contract expiration to migrate to a different service, as their service will be terminated on that date;
 - D. Customers with contracts expiring in 2007 or beyond must migrate to a different service on or before contract expiration, as their service will be terminated on contract expiration.

Early termination penalties will be waived for Integrated PrimePath NBX customers wishing to terminate their Integrated PrimePath NBX service and migrate to a different service prior to their contract expiration.

- ² Effective December 30, 2015, this service is no longer available to new customers or for contract renewals. This applies to Integrated Prime Services not already restricted in Footnote 1, preceding. (N)
- ³ Effective June 1, 2016, existing customers with this service may retain their existing service, but may not conduct moves, adds or changes to the service on or after June 1, 2016. Existing customers with services provided under an unexpired contract will continue to receive the service pursuant to the terms and conditions of their contract until their current contract term expires. Upon expiration of such customer's contract, AT&T will provide the service on a month-to-month basis, subject to the limitations on moves, adds, and changes described above. (N)

TC Systems, Inc.
P.S.C. No. 6 -- Telephone
Local Exchange Services
Effective Date: December 16, 2011

Section 13
Leaf No. 2
Revision: 0

SECTION 13 – INTEGRATED PRIME SERVICE

13.1 Description (Cont'd)

The service provides direct inward dialing capability as well as outward calling capabilities. Service charges are billed on a monthly basis, and are based on the service area in which the Customer is located. The features and corresponding rates available for use with PrimePath, PrimePath NBX and Prime Digital Trunks are also available for use with Integrated Prime Service. Monthly recurring and non-recurring line charges are shown below. There is no minimum channel size requirement for Integrated Prime Service.

Integrated PrimePath services provide a Customer with one or more analog, voice-grade telephonic communications channel(s) that can be used to place or receive one call at a time. Integrated PrimePath is provided for connection to Customer-provided single-line terminal equipment such as station sets or facsimile machines. Integrated PrimePath is offered as either business lines, key lines, or business trunks. Customers utilizing Integrated PrimePath services must subscribe to a sufficient number of access lines to handle adequately the volume of traffic offered (received or originated) without interfering with any of the services offered by the Company.

Integrated Prime Digital Trunks (PDT) is a fractional digital switched service that provides trunk connections from an end user's Private Branch Exchange or capable Key System to the Company Switch Port. The Customer may opt to utilize Integrated PDT service for outgoing calls only (DOD), incoming calls only (DID), or a combination of both inbound and outbound calls. When the Customer elects to utilize Integrated PDT for both inbound and outbound calls, they may choose Two-Way service which allows incoming to an attendant only or they can elect to utilize DID/DOD service which allows incoming calls to be terminated directly to an end user behind a PBX or capable Key System. When DID or DID/DOD service is ordered, direct inward dialing (DID) numbers must be purchased from the Company. Per subscribed Rate Center, the Customer is required to subscribe to sufficient number of trunks or channels so as not to degrade the Company's network below an incoming call completion rate of 99 percent. The call completion rate is based on an average of the busy hours occurring during the Customer's busiest hours during the billing cycle. Once the service has been established, the Company may require the Customer to increase the number of Integrated PDT trunks or channels to satisfy the call completion criteria listed above.

Local Exchange Services
Effective Date: December 16, 2011

Section 13
Leaf No. 3
Revision: 0

SECTION 13 – INTEGRATED PRIME SERVICE

13.1 Description (Cont'd)

Integrated PrimePath NBX is a central office-based analog communications Centrex service available to customers who do not wish to own and operate a PBX. Features and functions normally resident in the PBX are resident in the central office switch (DMS and 5ESS), and are subscribed to by the customer. Rather than purchasing DID/DOD trunks and numbers between the Local Serving Office (LSO) and a PBX, the customer subscribes to AT&T's CO-based service. The service provides direct inward dialing capability.

1. Customers subscribing to this service must have AT&T channelized SINA T1 or Frame Relay T1 with spare channels and M24 Multiplexing, and must have CPE Multiplexor equipment that provides voice trunk and/or channel signaling.
2. Channel Bank is not included with Integrated Prime Service.
 - a. For AT&T Integrated Prime Digital Trunks, The Customer's M24/Channel Bank must provide a T1 interface to the Customer's digital trunk interface in the PBX.
 - b. For AT&T Integrated PrimePath Trunks, Customer's M24/Channel Bank must provide DS-0 analog connections to an analog trunk card. The Local Network Service interface to the customer will be the SINA T1 or Frame Relay T1 interface.
 - c. For AT&T Integrated PrimePath Lines and AT&T Integrated PrimePath NBX analog lines, Customer's M24/Channel Bank must provide individual analog line side interface to each of the customer's station equipment such as single line telephone sets. The Local Network Service interface to the customer will be the SINA T1 or Frame Relay T1 interface.
3. Customers subscribing to this service are required to pay the monthly recurring rates for Integrated Prime Service as specified below whether or not all implemented, optional, or enhanced features are activated at the time of initial installation of Integrated Prime Service. A non-recurring charge will apply when a customer elects to activate any implemented or optional feature subsequent to initial installation. Optional features carry an additional monthly recurring charge and an additional initial installation fee.

A customer may elect to subscribe to Integrated Prime Service optional features at initial installation or subsequent to initial installation, subject to the applicable recurring and additional non-recurring charges.

Superseding Revision: 0

SECTION 13 – INTEGRATED PRIME SERVICE

13.1 Description (Cont'd)

4. If the service is terminated in whole or in part by the customer after initial installation, but prior to the completion of the service period, the customer shall be liable for the charges applicable for the remaining contract period. The formula for such charges is number of lines times number of months remaining times line rate.
5. If customer adds lines after initial installation during the time of the contract and these additional lines consist of less than or equal to 50% of the original order, the additional lines are contracted at the same rate as the initial lines, but the contract termination date shall be the original contracted date.
6. If customer adds lines after installation during the time of the contract and these additional lines in total consist of more than 50% of the original order, then a new contract must be executed with a new termination date and at the current tariffed rate for all lines.
7. Customers relocating within the same Company metropolitan service area where Integrated Prime Service is available may continue on the same contract, subject to additional installation and service order charges. (T)
8. Customers extending service beyond the contract period without a new contract will automatically renew on a month-to-month basis at the highest available line, feature and usage rates associated with Integrated Prime Service.
9. Standard line treatment options for blocking apply to all lines, as well as standard 4 digit dialing plans for internal Integrated Prime Service system calling.
10. Enhanced features are available for an additional charge as described for PrimePath, PrimePath NBX or Prime Digital Trunks services.

13.2 Features

All Standard, Implemented, Optional and Enhanced features offered for use with PrimePath Service, PrimePath NBX Service, and Prime Digital Trunk are available for use with Integrated Prime Service, and at the rates and charges specified in this tariff. The descriptions of the features are found in Section 6.1 of this tariff.
