## ACCESS SERVICE

14. EQUAL ACCESS/NETWORK RECONFIGURATION COST RECOVERY14.1 General Description

Equal Access/Network Reconfiguration Cost Recovery (EANR) is a monthly charge assessed to Interexchange Carriers (ICs) who obtain Feature Group D Switched Access Service, hereinafter referred to as equal access.

14.2 Rate Regulations

- (A) The EANR monthly charge is based on the total number of equal access lines, as set forth in (B) following, and the total number of pre-subscribed equal access lines, as set forth in (C) following.
- (B) The total number of equal access lines in a LATA is all in-service lines and trunks provided at end user locations and served by end offices equipped with equal access.
- (C) The total number of pre-subscribed equal access lines is the sum of (1) all equal access lines and trunks in a LATA for which customers have designated an IC as the pre-designated carrier and (2) all equal access lines and trunks in a LATA which are not pre-subscribed to an IC but continue to have access to intrastate MTS/WATS without dialing an IC's access code.
- (D) For each IC which obtains Feature Group D, the Telephone Company will determine the percent applicable to that IC on a LATA wide basis. The percent will be calculated by dividing the total number of pre-subscribed equal access lines and trunks pre-subscribed to that IC by the total number of pre-subscribed equal access lines. The total number of pre-subscribed equal access lines pre-subscribed to the IC which provides intrastate MTS/WATS also includes all lines and trunks set forth in (C)(2) preceding. The IC percent will be calculated separately for each LATA in which the IC obtains Feature Group D. The Telephone Company will adjust the percent applicable to each IC on a monthly basis.

ACCESS SERVICE

14. EQUAL ACCESS/ NETWORK RECONFIGURATION COST RECOVERY (Cont'd)

14.3 Rate Application

The EANR monthly charge is assessed to each IC as follows: the IC's percent of total number of pre-subscribed equal access lines in a LATA is applied to the total number of equal access lines within that LATA, and then multiplied by the monthly rate per equal access line.

Monthly EANR Charge =

Interexchange carrier's % total number of pre-subscribed equal access lines X total number of equal access lines X monthly rate per equal access line.

Rates and charges for EANR are set forth in Section 30.14 following.
