

PEERLESS NETWORK OF NEW YORK, LLC  
Effective: February 12, 2012P.S.C. No. 4 – Telephone  
Section 7  
Original Page No. 11SECTION 7 - BUSINESS NETWORK SWITCHED SERVICES (continued)7.2 SERVICE DESCRIPTIONS AND RATES (continued)

## 7.2.4 IP Control Service

IP Control is a DID voice line equivalent service used to connect the public switched telephone network and a customer's IP-based telephone equipment for the transmission of voice, data, or video traffic using Session Initiation Protocol (SIP). IP Control may be provisioned using Company or customer provided access

Trunk and port charges will be based on DS-0 equivalent concurrent SIP sessions derived by taking the total incoming DID traffic divided by 7,000,000 minutes multiplied by 672. A minimum of 24 DS0 equivalent SIP sessions is required and each additional concurrent SIP session will be billed individually.

When customer provided access is used (including but not limited to public internet access), trunk and end user common line (EUCL) charges will not apply. EUCL charges will be applied according to the Peerless Network FCC Tariff for all Company provided access.
