43. BALANCING SERVICE CHARGE

Balancing Service Charge

Service Classification Nos. 9 & 11

All gas consumed by customers under Service Classification Nos. 9 and 11 will be subject to a volumetric Balancing Service Charge. The Balancing Service Charge is designed to recover from customers a prorata share of the Company's gas storage and other relevant costs.

Two separate rates will be calculated for Service Classification Nos. 9, 11 and 11- Distribution Large Mains (DLM): one for daily balanced customers and one for monthly balanced customers. These rates will be updated at least annually, to be effective April 1 of each year, and will be based on each Service Classification's total consumption and deliveries during the preceding winter period, of November 1 through March 31, and the Company's most recently available gas storage and other relevant costs.

For Service Classification No. 11 DLM customers, the rates set forth below will remain in effect until March 31, 2008 at which time they will be revised according to the procedure contained herein:

	Monthly	Daily
	<u>\$/Mcf</u>	<u>\$/Mcf</u>
S.C. No 11 DLM	0.0463	0.0164

The rates so determined will be stated in whole \$0.000 amounts per Mcf.
