REVISION: 0
SUPERSEDING REVISION:

SERVICE CLASSIFICATION NO. 25 (Continued)

INTERCONNECTION CHARGES:

Customers taking service under this Service Classification shall be subject to the following interconnection charges:

- (1) Customers with generation facilities on their premises that (1) commenced operation between February 1, 2000 and December 30, 2004, have a nameplate rating of 300 kVA or less, and are connected in parallel with a radial distribution feeder; or (2) commenced operation after December 30, 2004, have a total nameplate rating of 2 MW or less, and are connected in parallel with the Company's distribution system shall be subject to the following interconnection charges:
 - (a) An advanced payment for the estimated costs of any equipment and facilities installed on the Company's system, including metering, necessary to permit operation of the customer's generation facilities in parallel with the Company's system.
 - (b) A cost based advanced payment for the estimated cost of the Company's review of the customer's proposed interconnection design package and for any studies performed by the Company to ensure the safety and reliability of the electric system with respect to the interconnection of the customer's generation facilities, including a non-refundable application fee of \$350 payable at the time of application. The application fee shall not apply to units with a total rating of 15 kW or less.
 - (c) The Company shall reconcile its actual costs of items (a) and (b) with the advance payments made by the customer, and the customer shall pay or the Company shall refund, without interest, the difference.
- (2) The following provisions are applicable to customers with private generation facilities on their premises not connected directly to transmission facilities above 138 kV that (1) commenced operation prior to February 1, 2000; or (2) commenced operation between February 1, 2000 and December 30, 2004 and either have a total nameplate rating between 301 kVA and 2 MW or between 401 kW and 2 MW in the case of Farm Waste Generators, or are connected in parallel with a network system; or (3) have a total nameplate rating greater than 2 MW and are connected in parallel with the distribution system:
 - (a) Such facilities shall be subject to the interconnection standards set forth in the Company's "Operating, Metering, and Equipment Protection Requirements For Parallel Operation of Generating Facilities" appropriate for the nameplate rating of the customer's generator.
