PASNY DELIVERY SERVICE

Special Provisions – Continued

3. The Special Provisions of SC 6 of the Schedule for Electricity are applicable to service under this Rate Schedule except as modified below:
- (A) Special Provision A of SC 6 of the Schedule for Electricity, as applicable to the delivery of power and energy for public street lighting, is replaced by the following Special Provision:

The electric energy delivered under this Special Provision for Westchester street lighting will be unmetered. The kWhr consumption shall be determined by the Company from the manufacturer's rated wattage and the total number of lamps and auxiliary equipment in operation, multiplied by the number of hours of operation for the month, subject to deduction of 3.5 percent as an allowance for any service outages.

With respect to the electric energy delivered for street lighting in The City of New York, the billing demand per lamp for lamps burning continuously shall be the rated watts of the lamps plus the rated watts of auxiliary equipment required for the operation of such lamps. The billing demand per lamp for lamps burning alternatively or intermittently for traffic control and similar applications shall be the rated watts per lamp plus the rated watts of required auxiliary equipment multiplied by the percent, expressed to the nearest whole percent, of time such lamps are burning during the period the lamps are in operation. The results of this computation shall be expressed to the nearest watt. The kWhr consumption and the watts of billing demand shall be subject to deduction of 3.5 percent as an allowance for service outages except that if such outages occur as a result of abnormal operating conditions, which cause interruption of the supply of energy to a large number of lamps then the Company shall estimate such abnormal outages from the records and make deduction therefor, upon the approval thereof, by the City.

The Company shall have the right from time to time to inspect and make tests of the City's equipment as installed or of samples thereof furnished by the City for the purpose of checking the rating and wattage of the lamps and auxiliary equipment and the hours of operation.
