PASNY DELIVERY SERVICE

General Provisions - Continued

Standby Service

PASNY Customers who take Standby Service are subject to all terms and conditions of General Rule 20 of the Schedule for Electricity, including billing under Standby Service rates, unless exempt, and the Interconnection Charge, except as General Rule 20 is modified below:

“Customer” in General Rule 20 means “PASNY Customer” under this Rate Schedule unless expressly stated otherwise below.

“Standby Service rates,” as defined in General Rule 20.1, means Rate III or Rate IV of this Rate Schedule.

Contract Demand, as specified in General Rule 20.4, is established for the account of a PASNY Customer either by PASNY or the Company. The rules related to “Customers” who establish and revise their Contract Demand are applicable to “PASNY” under this Rate Schedule. Where PASNY accepts a Company-set Contract Demand, no penalties shall apply if that Contract Demand is exceeded.

General Rule 20.3.1(b) means, under this Rate Schedule, PASNY Customers who would otherwise receive service under the Energy Charge of Rate I if they did not have on-site generation. The election specified under General Rule 20.3.1(c) must be made by PASNY in advance in writing at least 30 days before the PASNY Customer commences operation of the on-site generation facility.

The following provisions of General Rule 20 are not applicable to service under this Rate Schedule: Section (B)(7) of General Rule 20.2.1, and General Rules 20.5, 20.6, 20.7, 20.8, and 20.9.

Applications for Standby Service under this Rate Schedule must be made in writing by PASNY.

The delivery charges applicable to all PASNY Customers billed under Standby Service rates include, but are not limited to, a Customer Charge per month, a Delivery Service Contract Demand Charge, and As-used Daily Delivery Service Demand Charges. Where meter data is not available, the As-used Demand will be based on the best available data. For a Customer who is a wholesale generator, As-used Demand Charges under Rate III and Rate IV will not apply to demand experienced during any period when it self-supplies all of its energy needs from the load side of the meter.
