LOCAL EXCHANGE SERVICES TARIFF

SECTION 5 - SUPPLEMENTAL SERVICES, (CONT'D.)

5.18 Business Line and Terminal Features, (Cont'd.)

5.18.2 Description of Features, (Cont'd.)

N. Selective Call Rejection

Selective Call Rejection enables a Customer to reject call attempts from Customer specified numbers by dialing a code and the telephone numbers of calls to be rejected. Any call attempts to the Customer from these numbers will be prevented from terminating to the Customer and will instead be connected to an announcement informing the caller that the call is not presently being accepted by the called party. A Customer may also reject future calls from the directory number of the most recent call received by dialing a code after completing the call.

O. Speed Calling*

This feature allows a user to dial selected numbers using one or two digits. Up to eight numbers (single digit, or thirty numbers with two digits) can be selected.

P. Three-way Calling

The Three-way Calling feature allows a Customer to add a third party to an existing two-way call and form a 3-way call. The Call Hold feature allows a Customer to put any in-progress call on hold by flashing the switchhook and dialing a code. This frees the line to allow the Customer to make an outgoing call to another number. Only one call per line can be on hold at a time. The third party cannot be added to the original call.

*Not available to Converged Voice Services Customers.
