SECTION 6 - BUSINESS NETWORK SWITCHED SERVICES, (CONT'D.)

6.2 Service Descriptions and Rates, (Cont'd.)

6.2.3 Analog PBX Trunk Service

A. General

Analog PBX Trunk Service provides a Customer with a single, voice grade telephonic communications channel which can be used to place or receive one call at a time. Analog PBX Trunk Service provides a connection from a Customer-provided PBX to the public switched telecommunications network.

Each Analog PBX Trunk can be configured as an Inward, Outward or Two-Way Trunk. Customers may purchase Individual Telephone Numbers for use with Inward and Two-Way trunks for additional charges as set forth in Section 6.2.4. This enables a PBX to switch an incoming call directly to the intended extension number without the need for an attendant.

Analog PBX Trunk Service may be configured into a hunt group with other Company-provided Analog PBX Trunks.

1. Flat Rate Analog PBX Trunks

Flat Rate Analog PBX Trunks provide the Customer with unlimited outward dialing within the Company-designated local calling area at no additional charge for local calling.

2. Message Rate Analog PBX Trunks

Message Rate Analog PBX Trunks provide the Customer with message rated dialing within the Company-designated local calling area.

3. Measured Rate Analog PBX Trunks

Measured Rate Analog PBX Trunks provide the Customer with measured rated dialing within the Company-designated local calling area.
