

SECTION 5 - SUPPLEMENTAL SERVICES

5.1 CUSTOM CALLING SERVICE

5.1.1 General

The features in this section are made available on an individual basis or as part of multiple feature packages. All features are provided subject to availability; features may not be available with all classes of service. Transmission levels may not be sufficient in all cases.

5.1.2 Description of Features

a. Three Way Calling

This service allows an existing call to be held while a second telephone call is made and then added to the existing connection. The customer pays for calls placed from his/her telephone to the other telephone on the connection.

b. Call Forwarding

Call Forwarding, when activated, redirects attempted terminating calls to another customer-specific line. The customer may have to activate and deactivate the forwarding function and specify the desired terminating telephone number during each activation procedure. Call originating ability is not affected by Call Forwarding.

The calling party is billed for the call to the called number. If the forwarded leg of the call is chargeable, the customer with the Call Forwarding is billed for the forwarded leg of the call.

Call Forwarding - Busy automatically reroutes an incoming call to a customer pre-designated number when the called number is busy.

Call Forwarding - No Answer automatically reroutes an incoming call to a customer pre-designated number when the called number does not answer within the number of rings programmed by the Company.
