#### NOTES:

- If you intend to construct units with varying amperage requirements, please attach a listing of these requirements on a separate page.
- The installation of pumping stations, elevators, or any other 3 phase equipment requires different design and pricing procedures. Please advise O&R of any 3 phase requirements before submitting your project for design.
- All local Municipalities require O&R to submit a street light design as part of the application processing procedure. If you do not wish to have street lighting incorporated into your project, you must submit a letter from the municipality that releases you from this obligation.
- NOTE: For multiple meter installations, see the reverse side of this form. Additional signatures are REQUIRED if you install more than one meter per unit.
- O&R will design for a maximum of 200 amps/unit unless otherwise notified.
