GENERAL INFORMATION

31. SYSTEM ENERGY AND DEMAND LOSSES

Deliveries of energy and capacity to the Company's system on behalf of customers whose facilities are located in the Company's service area must include an additional amount to offset losses incurred on the Company's transmission and distribution systems. Indicated below are energy and demand loss factors which, when multiplied by a customer's metered usage, will yield the level of energy or capacity that must be delivered to the Company's system to accommodate the customer's requirement and system losses.

Following are loss factors by Service Classification:
