### SECTION I: DEFINITIONS

DID Trunk: A form of local switched access that provides the ability for an outside party to call an internal extension directly without the intervention of the company operator.

Digital Signal Level I ("DS-1"): A 1.544 Mbit/s signal (Ti carrier).

Direct Inward Dial or ("DID"): A service attribute that routes incoming calls directly to stations, bypassing a central answering point.

Direct Outward Dial (or "DOD"): A service attribute that allows individual station users to access and dial outside numbers directly.

Disconnection: The disconnection of a circuit, dedicated access line or port connection being used for existing service.

Do Not Disturb: Permits the attendant to cut off a single station line and selected groups of station lines from receiving incoming and station-to-station calls.

DSX-1 Panel: Distribution equipment used to terminate and administer DS 1 (1.544 Mbps) circuits.

Dual Tone Multi-Frequency (or "DTMF"): The pulse type employed by tone dial station sets.

Duplex Service: Service which provides for simultaneous transmission in both directions.

Fiber Optic Cable: A thin filament of glass with a protective outer coating through which a light beam carrying communications signals may be transmitted by means of multiple internal reflections to a receiver, which translates the message.

Foreign Listing: A form of listed service consisting of a listing in a book other than the book local to a customer's community, driven by the NPAJNXX or service address, depending on the dominant Local Exchange Carrier in the area.

Hunting: Routes a call to an idle station line in a prearranged group when the called station line is busy.  
b-Only: A service attribute that restricts outward dial access and routes incoming calls to a designated answer point.

Interconnection: The connection of telephone equipment to the network; also, the connection of one carrier with another, i.e., the interface between carriers.
