## SECTION 7: LOCAL CALLING SERVICE

### 7.1 Description

Local Calling Service provides Customers with the ability to originate calls from a Company-provided access line to any other station on the public switched telephone network bearing the designation of any central office exchanges included in the caller's local calling area as defined in Section 4.2. The rates set forth in this section apply to all direct-dialed local calls. For operator-assisted local calls, the operator charges listed in Section 8.1.3 apply in addition to the charges listed below.

Local Calling Service is provided to Business customers as one of the following options: Measured Rate Service or Message Rate Service. Both options are usage-based local calling plans provided with exchange access services, as described in Section 5. Measured rate and message rate services provide for charging on a per-call basis on calls to the local calling area with no usage allowance included in applicable monthly recurring rates.

### 7.2 Measured Rate Service

Measured Rate Service is billable on a per minute basis. Calls are billed in one-minute increments with an initial billing period of one minute. The rates set forth in this section apply to all outgoing direct-dialed calls placed to telephone stations within the caller's local calling area as defined in Section 4.2.1.

	<u>1YR</u>	<u>2YR</u>
Rate per minute	\$0.014	\$0.012

### 7.3 Message Rate Service

Under the Rate Per Message Plan, calls are measured as message units. A message unit is an outgoing direct-dialed call placed to telephone stations within the caller's local calling area as defined in Section 4.2.1.

	<u>1YR</u>	<u>2YR</u>
Rate per minute	\$0.08	\$0.07
