SECTION 10: DIGITAL SUBSCRIBER LINE SERVICE

10.1 Description

Digital Subscriber Line (DSL) Service provides a customer with high speed Internet access. The service is available on ILEC-provided unbundled network elements (UNEs) and is currently available as facilities permit. DSL service is available with or without voice telephone service provided on the same facility. The customer can get upstream speeds of up to 512 Kbps and downstream speeds of up to 1.5 Mbps depending upon various factors including the distance of the customer's location from the central office and the quality of the UNE provided by the ILEC. It is the customer's responsibility to secure the ISP connectivity that is required for the data portion of the DSL Service.

10.2 Rates
