SECTION 2: REGULATIONS

2.13 Demarcation Points (cont'd.)

(E) Continuous Property (cont'd.)

- (5) The INC and Inside Wire Demarcation Points are located as described in (B) and (C) preceding.
- (6) At the request of a property owner, a Company may waive the designation of a single Local Loop Demarcation Point for a Continuous Property if, due to the unique characteristics of the property, a hardship would be created for the property owner and/or the Company. Examples of such Continuous Property may include, but are not limited to, (a) national, state and local parks, beaches, highways, harbors and similar publicly-owned property and (b) railroad rights-of-way and extensive, privately-owned tracks of land with developed communities and similar privately-owned property. The Company will treat land within the boundaries of privately-owned property under (b) above as Continuous Property provided that it had characteristics of Continuous Property, e.g., (a) it is wholly leased by a single individual or entity and (b) it contains or will contain multiple buildings.

This paragraph is not intended in any way to waive the unbundling of INC in each building.
