

Onvoy, Inc. d/b/a Onvoy Voice Services
Effective: April 23, 2012

New York PSC No. 1 – Access Service
Leaf: 52
Revision: 0
Superseding Revision:

SECTION 5. SWITCHED ACCESS

II. Provision and Description of Switched Access Service Arrangements (Continued)

C. Rate Categories (Continued)

3. **End Office Shared Port:** The End Office Shared Port rate provides for the termination of common transport trunks in shared end office ports and in remote switching system ports. The End Office Shared Port rate is assessed on a per-MOU basis to all trunkside originating and terminating access minutes utilizing tandem routing to a Company end office. If tandem routing is being utilized to a remote switching system (via a host office), the End Office Shared Port rate is assessed to the access minutes originating or terminating from the remote switching system.
4. **8XX Data Base Query:** When an 8XX + NXX + XXXX call is originated by an End User or delivered by a connecting carrier to the Onvoy network unqueried, the Company will perform Customer identification based on screening of the full ten-digits of the 8XX number to determine the Customer location to which the call is to be routed. A Basic Query Charge covers the identification of the toll carrier to whom the call should be delivered. A Vertical Query includes the Basic Query function plus such functions as call validation (ensuring that calls originate from subscriber service areas); POTS translation of 8XX series numbers; alternate POTS translation where End Users can vary the routing of the 8XX calls based on time of day, place, etc.; and multiple carrier routing.
