

PSC NO: 10 – Electricity  
Consolidated Edison Company of New York, Inc.  
Initial Effective Date: 03/19/2012  
Issued in compliance with order dated 03/15/2012 in Case 09-E-0115

Leaf: 290  
Revision: 1  
Superseding Revision: 0

## GENERAL RULES

### 24. Service Classification Riders (Available on Request) - Continued

#### RIDER U – DISTRIBUTION LOAD RELIEF PROGRAM – Continued

##### J. Summer Reservation Payments Program - Continued

###### 7. Performance Factor

- a. Performance Factor” when an Emergency Event is called, is the ratio of (i) the average hourly kW of Load Relief provided by the Customer or Aggregator during the first five hours of the Load Relief Period up to the kW of contracted Load Relief to (ii) the kW of contracted Load Relief. “Performance Factor,” when an Immediate Event is called, is the ratio of (i) the average hourly kW of Load Relief provided by the Customer or Aggregator during the highest consecutive five hours during the first seven hours of the Load Relief Period up to the kW of contracted Load Relief to (ii) the kW of contracted Load Relief. “Performance Factor,” when a Test Event is called, is the ratio of (i) the kW of Load Relief provided during the Test Hour by the Customer or by the Aggregator up to the kW of contracted Load Relief to (ii) the kW of contracted Load Relief. “Performance Factor,” when more than one Contingency Event, Immediate Event and/or Test Event is called in a Network during the month, refers to the average of the Performance Factors for the Customer or the average of the Performance Factors for the Aggregator in the Network during that month. Where service is taken under this Rider by an Aggregator, “the kW of contracted Load Relief” is measured on a portfolio basis by Network by CBL Verification Methodology. The Performance Factor is rounded to two decimal places and has an upper limit of 1.00 and a lower limit of 0.
- b. The Performance Factor for the month is used to calculate Reservation Payments for that month and each month thereafter until the month in which the next Test Event or Load Relief Period is called by the Company in that Network during the current or subsequent year’s Summer Capability Period. The Performance Factor for the month is also used to calculate payments for Bonus Periods, if applicable.
- c. If the Customer or Aggregator did not participate in the program during the prior Summer Capability Period, and no Load Relief Periods or Test Events have been designated in the Network since the Customer or Aggregator enrolled in the program, the Performance Factor at the end of the current month is assumed to be 1.0.
- d. If the Customer or Aggregator is asked to respond to more than six Contingency Events and/or Immediate Events in a specific Network during the Summer Capability Period, performance during each event after the sixth event will only be included in the Performance Factor calculation if this would result in a higher Performance Factor.
