SECTION 3 - DESCRIPTION OF SERVICE, Continued

3.3.   OPTIONAL CALLING FEATURES

3.3.1.   Custom Calling Feature Descriptions

Company offers the following custom calling features. Feature availability is based on Customer location and network availability.

A. Anonymous Call Rejection: Permits the End-User to automatically reject incoming calls when the call originates from a telephone number that has blocked delivery of its calling number (see Calling Number Delivery Blocking). When active, calls from private numbers will be routed to a special announcement, and then terminated. The feature may be turned on or off by the End-User by dialing the appropriate feature control code.

B. Caller ID: Name and Number: Permits the End-User to view a Directory Name and Directory Number of the calling party on incoming telephone calls. Information is displayed on specialized Customer Provided Equipment. The feature also provides the date and time of each incoming call. It is the responsibility of the Customer to provide the necessary equipment. In some situations, the calling party's city and state may be displayed, rather than a Directory Name, depending on available call data.

C. Call Forward: Forwards all calls immediately upon reaching the End-User's line to a number of the End-User's choice. The forward-to number can be changed anytime from the line equipped with this feature.

D. Call Forward: Busy Line: Permits the forwarding of incoming calls when the End-User's line is busy. The forwarded number is fixed by the End-User Service order.

E. Call Forward: Don't Answer: Permits the forwarding of incoming calls when the End-User's line remains unanswered after a pre-designated ringing interval. The ringing interval before forwarding and the forward-to number are fixed by the Service order.
