Revision: 0
Superseding Revision:

SECTION 5 – LOCAL EXCHANGE SERVICE

5.1 Inbound Calling Service

Inbound Calling Service is a DID voice line equivalent service used to connect the public switched telephone network and Customer's equipment for the transmission of voice, data, or video traffic. This Service allows Business End Users to designate an area in the Company's Central Office as the Business End User's Designated Premises, based upon space availability. Inbound Calling Service may be provisioned using Company or Customer provided access. Transport and Port charges will be assessed on a DS0-equivalent basis derived by taking the total incoming DID traffic divided by 7,000,000 minutes multiplied by 672.

When Customer-provided access is used, Transport and End User Common Line (EUCL) charges will not apply. EUCL charges will be applied according to the Company's FCC tariff for all Company-provided access.

Monthly Recurring Charges (MRC)

	<u>Per DS0-equivalent</u>	
	<u>Minimum</u>	<u>Maximum</u>
<u>Transport Charges</u>		
Per mile (minimum 1 mile)	\$0.50	\$2.00
<u>Port Charges</u>		
0-1 DS3s	\$2.50	\$10.00
2-3 DS3s	\$2.00	\$8.00
4-5 DS3s	\$1.50	\$6.00
6-8 DS3s	\$1.00	\$4.00
9+ DS3s	\$0.50	\$2.00

Usage charges
