INTRASTATE SWITCHED ACCESS SERVICES TARIFF

TARIFF FORMAT

Leaf Numbering - Page numbers appear in the upper right hand corner of the page. Pages are numbered sequentially, and from time to time new pages may be added to the tariff. When a new page is added between existing pages, a decimal is added to the preceding page number. For example, a new page added between Page Nos. 3 and 4 would be numbered 3.1.

Leaf Revision Numbers - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current page version on file with the Commission. For example, the 4th revised Page 25 cancels the 3rd revised Page 25. Because of various suspension periods, deferrals, etc. the Commission follows in the tariff approval process, the most current page number on file with the Commission is not always the tariff page in effect.

Paragraph Numbering Sequence - There are various levels of alphanumeric coding. Each level of coding is subservient to its next higher level. The following is an example of the numbering sequence suggested for use in tariffs.
