INTRASTATE SWITCHED ACCESS SERVICES TARIFF

SECTION 2 - RULES AND REGULATIONS (CONT'D.)

2.3 Customer Reporting (Cont'd.)

2.3.1 Jurisdictional (Cont'd.)

The Customer shall keep records of call detail from which the percentage of interstate and intrastate use can be ascertained and, upon request of VT, shall make the records available for inspection as reasonably necessary for purposes of verification of the percentages. VT reserves the right to conduct an audit at any time. The Customer, at its own expense, has the right to retain an independent auditing firm. If the audit results represent a substantial deviation from the Customer's previously reported PIU for the period upon which the audit was based, the call detail records may be requested more than once annually.

For Feature Group B or D Switched Access Service(s), where jurisdiction can be determined from the call detail, VT will determine the projected PIU factor as follows: the projected PIU factor will be developed on a monthly basis by end office, by dividing the measured interstate originating or terminating access minutes (the access minutes where the calling number is in one state and the called number is in another state) by the total originating or terminating access minutes.

No pro-rating or back-billing will be done based on the report. VT may require call detail records to substantiate projected interstate usage provided to VT.
