                                            Superseding Revision:

SECTION 5 - <u>SUPPLEMENTAL SERVICES</u> (cont'd)

5.5   CALLER ID BLOCKING

A calling party may block the passage of his/her telephone number, associated main listed
name and voiceback of calling identification information to users or subscribers to Optional
Central Office Services which utilized Signaling System 7 (SS7) technology. Blocking will
also prevent call completion through the use of Return Call Service.

Customers have two blocking options as follows:

5.5.1   Per-Call Blocking

Per-Call Blocking will prevent the display of Customers' telephone numbers on
outgoing calls. This feature may be utilized at any time through the activation of a
special code prior to dialing an outgoing call.

Per-Call Blocking is provided at no charge, and is automatically placed on all
telephone lines by the Company.

Per-Call Blocking will not prevent the display of telephone numbers to 911
emergency service providers.
