Section 11
Leaf No. 2
Revision: 0

SECTION 11 – PRIMEXPRESS NETWORK SERVICE

11.2 PrimeXpress High Volume Inbound Calling Option: PrimeConnect

Digital PrimeXpress Network Service can be configured to support high volumes of inbound calling. PrimeConnect is the High Volume Inbound Calling option that: 1) supports a maximum of two rate centers per DS1 facility or T1 trunk, 24 DSOs, within the TCG designated service area, 2) supports inbound calling only, 3) equals or exceeds an average call duration of 10 minutes per call, 4) equals or exceeds CCS loading of 32 CCS, and 5) equals or exceeds 200,000 MOU per month. The Customer will be charged rates for PrimeConnect Service as described in the Price List. The Company reserves the right to audit the Customer's PrimeXpress usage for the above conditions.

The Customer is required to subscribe to a sufficient number of DS1 trunks at a maximum usage of 400,000 MOU so as to not degrade the TCG network below an incoming call completion rate of 99%. The call completion rate is based on an average of the busy hours occurring during the Customer's busiest hours during the billing cycle. Once the service has been established, the Company may require the Customer to increase the number of PrimeConnect trunks to satisfy the call completion criteria listed above.

A. PrimeConnect Customer Access Requirements:

PrimeConnect supports inbound calling only, and does not include outbound calls to Operator Assisted Services, Special Service Codes, Special Access Codes or Carrier Access Codes. The Customer is responsible for securing individual business lines, or other appropriate facilities, to access these services and/or codes, including:

- Conference Calls,
- Calls to Special Service Codes including 500, 700, 900, 976, N11 (where N = 2-9) or other special service codes that may be created, or
- Calls to 0 and 00

- B. PrimeConnect is intended solely for the purposes of providing local and intraLATA non-toll access into a Customer's location. In the event that local and intraLATA non-toll calls placed into a Customer's location become subject to additional charges imposed by connecting carriers or by regulation, the Company reserves the right to modify the facility rate charges for traffic into the location upon 30 days written notice to the Customer. The Customer has the option to accept the rate change(s) or terminate the contract without penalty, unless specifically bound to specific commitments associated with capital recovery, special construction, or other issues written into the Customer's contract or agreement with the Company over and above the normal terms and conditions of the contract or agreement.

11.3 Features

The following features are available with PrimeXpress Network Service, and the descriptions of the features are found in Section 6.1.

- Incoming Call Redirect (ICR)
