SERVICE DESCRIPTIONS (cont'd)

3.1 Access Services (cont'd)

3.1.3 Other Rate Categories

A) Toll Free Data Base Access Service

Toll Free Data Base Access Service is a service offering utilizing originating trunk-side Switched Access Service. The service provides for the forwarding of End User dialed Toll Free calls to a Company Service Switching Point which will initiate a query to the data base to perform the Customer identification and delivery function. The call is forwarded to the appropriate Customer based on the dialed Toll Free number.

1) POTS Translation Charge

The POTS translation provides the option of having the ten digit POTS number NPA + NXX-XXXX delivered instead of the Toll Free dialed number (e.g. 800 + NXX-XXXX) delivered to the service provider.

A POTS translation Charge is assessed per query, in addition to the Toll Free Carrier Identification Charge as set forth in Section 5.1 of Section 5. The charges can be found with the Local Transport and Local Switching rates (Section 5.1 of Section 5).
