

PSC NO: 220 ELECTRICITY
NIAGARA MOHAWK POWER CORPORATION
INITIAL EFFECTIVE DATE: DECEMBER 5, 2011

LEAF: 199.3
REVISION: 1
SUPERSEDING REVISION: 0

GENERAL INFORMATION

36. Net Metering for Solar Electric Generating Equipment, Farm Waste Electric Generating Equipment, Micro-Combined Heat and Power Generating Equipment, and Fuel Cell Electric Generating Equipment

36.7.4.2.1 Any remaining monetary credit will be applied to the eligible designated satellite accounts in the order that each subsequent satellite account bills in the Company's billing system. In the case where more than one satellite account is billed on the same day, the monetary credit will be applied to the highest usage account first. This process will continue through each day in the billing cycle as each satellite account is billed. The monetary credit applied to each satellite account shall not exceed the satellite account's electricity delivery and electricity supply charges for that billing period.

36.7.4.2.1.1 Customers having both electric and gas service on the same account will receive separate bills for electric service and for gas service to ensure that net metering credits apply only to electric service on the satellite accounts

36.7.4.2.2 If a monetary credit still remains at the end of the current month's billing cycle after all eligible designated satellite accounts have been credited, the remaining credit will be carried forward on the host account to the next billing period at which time it will be applied to all eligible designated satellite accounts. The above process will be repeated in each subsequent month until any remaining monetary credit on the host account that is to be applied to eligible designated satellite accounts has been fully allocated.

36.7.4.2.3 A host account that is a residential Farm Solar Customer-Generator or a Farm Waste Customer-Generator who has a credit remaining at the end of their net metering year (12-month period), will have the portion of the credit equal to average avoided cost as calculated under Special Provision C of S.C. No. 6 of this tariff paid to the host account Customer-Generator. Any remaining monetary credit will be reset to zero at the start of the host account Customer-Generator's next net metering year.

Issued by Thomas B. King, President, Syracuse, NY
