

PSC NO: 15 ELECTRICITY
COMPANY: CENTRAL HUDSON GAS & ELECTRIC CORPORATION
INITIAL EFFECTIVE DATE: 01/01/12

LEAF: 163.5.15
REVISION: 0
SUPERSEDING REVISION:

38. NET METERING FOR CUSTOMER GENERATORS (Cont'd)

B. Non-Residential Solar Electric Generation (Cont'd)

Billing: (Cont'd)

3. For demand metered customers subject to hourly pricing provisions (HPP), as specified in the customer's applicable Service Classification, the energy delivery and energy supply sections of the customer bill will be calculated as follows:

(a) Energy Delivery

Applicable energy delivery per kWh rates will be applied to the customer's net purchases or net sales for the billing period. In the event that:

- (i) the amount purchased from the Company exceeds the amount sold to the Company (net purchases) in a billing period, the customer will be billed for the difference at the applicable rates specified in the customer's applicable Service Classification.
- (ii) the amount sold to the Company exceeds the amount purchased from the Company (net sales) in a billing period, the customer will be credited at the applicable rates specified in the customer's applicable Service Classification.

(b) Energy Supply

Applicable hourly energy supply per kWh rates will be applied to the customer's hourly net purchases or hourly net sales for the billing period. In the event that:

- (i) the amount purchased from the Company exceeds the amount sold to the Company (net purchases) in any given hour, the customer will be billed for the difference at applicable hourly rates.
- (ii) the amount sold to the Company exceeds the amount purchased from the Company (net sales) in any given hour, the customer will be credited at applicable hourly rates.
- (iii) the sum of the hourly charges and/or credits for a billing period results in a net charge, the customer will be billed for the calculated charge.
- (iv) the sum of the hourly charges and/or credits for a billing period results in a net credit, the credit will be applied against the Energy Delivery bill charges. To the extent that the value of the credit exceeds all components of the customer's total bill, the remaining credit shall be carried forward to the succeeding billing period.

In the event that the customer has a credit balance as a result of on-site production at the end of twelve (12) months from the time the customer contracted for this service, the credit will be carried forward to the succeeding billing period.

The minimum charge for Non-Residential Solar Electric Generating customers shall be the Customer Charge plus the Basic Demand Charge, as applicable. The Basic Active Demand will be the highest 15-minute integrated kilowatt demand established during the month for which the bill is rendered.
