

PSC NO: 10 – Electricity
Consolidated Edison Company of New York, Inc.
Initial Effective Date: 11/01/2011

Leaf: 262
Revision: 0
Superseding Revision:

GENERAL RULES

24. Service Classification Riders (Available on Request) - Continued

RIDER S – COMMERCIAL SYSTEM RELIEF PROGRAM - Continued

E. Metering – Continued

4. The Company will install interval metering (i) within three weeks of an applicant's request and payment for an upgrade to interval metering that has landline telecommunications capability, and (ii) within three weeks of the later of the Company's receipt of payment for an upgrade to interval metering with wireless communications capability and receipt from the participant of the active Internet Protocol ("IP") address that the wireless carrier has assigned to the modem's ESN. If the Company misses the installation time frame, it will make a "Lost Reservation Payment," unless the meter delay was caused by a reason outside the Company's control, such as the telephone company's failure to install a landline or, if, at the Company's request, the Commission grants the Company an exception due to a condition such as a major outage or storm. A Lost Reservation Payment will be calculated by determining the number of months between the earliest month in which the customer could have begun participation had the meter been installed within the required timeframe (assuming the Company's acceptance of a completed application and receipt of payment for the meter upgrade) and the first month following the completed installation, and multiplying that number by the pledged kW and associated per-kW Reservation Payment Rate.
