GENERAL INFORMATION - Continued

7. Service Classification Riders (Available on Request) - Continued

RIDER G - Customer Sited Supply Pilot Program - Continued

E. Interconnection Charges

In addition to the charges described in General Information Sections 3 and 4, Customers participating under this Rider shall be subject to the following charges for interconnection costs:

- a. A charge for the reasonable costs of providing service under this Rider, including but not limited to costs, as applicable, for the steam interconnect pipe and equipment, steam system reinforcement, isolation equipment, metering, and associated piping, incurred by the Company directly related to the installation of the facilities deemed necessary by the Company to permit the provision of service under this Rider, to the extent such costs are in excess of the Company's cost responsibility had the Customer taken firm service under SC 2 or SC 3, as applicable. All such facilities will remain the property of the Company.

The Customer may pay for the foregoing interconnection costs either: by paying in full prior to the commencement of service under this Rider; or by paying at least 25 percent of the interconnection costs prior to the commencement of service under this Rider and arranging with the Company to pay over not more than a five-year period the balance of such interconnection costs plus interest at the unadjusted Customer deposit rate in effect at the time a payment plan is agreed upon with the Company. The Company may require a Customer to provide adequate security for the payment of the balance of the interconnection costs due the Company under the payment agreement. All payments of incremental interconnection costs are non-refundable.

- b. An annual charge equal to 10 percent of the total capital costs of interconnection, to cover ongoing costs such as property taxes and operation and maintenance expenses. The annual charge is payable by the Customer once a year on the anniversary date that the first payment was made under this Rider. If elected by the Customer in writing, the Customer may instead pay the annual charge in monthly installments equal to one-twelfth of the annual charge.

F. Customer's Equipment

In accordance with the CSS Procedure, the Customer will be required to install and maintain, at its own expense, equipment capable of providing for: (1) real-time and local remote communication, measurement, and monitoring of the Customer's steam parameters (i.e., steam flows, pressure, temperature, select chemistry parameters, and alarms) and associated communication feedback between Customer location and Company's Energy Dispatcher; and (2) sampling of the Customer's steam.
