COMPETITIVE TELECOMMUNICATIONS SERVICE TARIFF

SECTION 6 - BASIC BUSINESS SERVICES (CONT'D.)

6.2 Service Descriptions and Rates, (Cont'd.)

6.2.2 NetServe Basic Business Line, (Cont'd.)

D. Line Hunting

Line hunting, which is provided subject to the availability of suitable central office facilities is an arrangement that groups together two or more main telephone exchange lines from the same central office so that incoming calls are automatically switched from the initial line, if in use, to the first non-busy line.

Line hunting is furnished with On-Net telephone exchange service only.

E. Pay-Per-Call Service Blocking

NetServe Basic Business Line cannot be used to originate calls to Pay-Per-Call services (e.g.: 900 and 976). Calls to those numbers and other numbers used for caller paid information services will be blocked by the Company unless a written request to remove blocking is attached to the Service Agreement.

F. Exchange Classifications

Business service is provided to each exchange on a measured basis and provides for calling within the local calling area and within municipalities on per minute basis as specified in Verizon New York, Inc.'s PSC NY No. 2 - Communications.

G. Trunk Lines

Trunk lines provided on a measured service basis equate to the single party measured NetServe Basic Business Line monthly rate.
