

PSC NY No. 10--COMMUNICATIONS

Verizon New York Inc.

Section 5
First Revised Page 105
Superseding Original Page 105NETWORK ELEMENTS5. Unbundled Network Elements (Cont'd)5.6 Unbundled Local Switching (Cont'd)5.6.1 Local Switch (Cont'd)5.6.1.6 Application of Usage Charges (Cont'd)(C) General Description of Usage Rate Elements (Cont'd)(4) Composite Local Switching, IOF and Tandem Resource Charges
Unbundled Common Transport Charge (UCTC)

The UCTC recovers the cost of delivering a local call from the originating end office to a terminating switch. The rate is assessed per minute of use and does not vary according to distance or whether the call was direct or tandem routed. Use of the originating shared trunk port, shared IOF and weighted tandem costs are recovered through this rate element. Non-conversation time and attempt additives as described above will be applied to the recorded conversation times to determine the ratable minutes. This element is used when a TC utilizes the existing Telephone Company network on a shared basis to transport calls within the LATA. The rates and charges are set forth in Section 5.3.4 preceding.

Transit Tandem Switching Charge (TTSC)

The TTSC recovers the costs of two shared tandem trunk ports and tandem switching. See Section 5.4 for a description of these tandem rate elements. Non-conversation time and attempt additives as described above will be applied to the recorded conversation times to determine the ratable minutes. This element is used when the involved trunks carry both access and local/toll usage, or as part of the UCTC element.

Unbundled Telephone Company Reciprocal Compensation Charge (UNRCC)

The UNRCC recovers the costs of Unbundled Local Switching Terminating (ULST) and one end office Shared Trunk Port. This charge applies when a call from an eligible TC's unbundled line port terminates to a Telephone Company switch.

(C)
(C)
(C)Unbundled TC Reciprocal Compensation Charge (UCRCC)

When a call from an unbundled line port terminates to a TC switch, the UCRCC charge will be assessed to the originating line port minute in order for the Telephone Company to recover the terminating intercarrier charges that will be assessed to the Telephone Company by the terminating TC. This charge will be a composite of the TC termination charges assessed to the Telephone Company. Unbundled TC reciprocal compensation charge composite rates will be recalculated on a quarterly basis to reflect the average rate per minute paid to CLECs by the Telephone Company over the previous three-month period. Such recalculated rate shall be effective on a prospective basis. In addition, the Telephone Company reserves the right to seek immediate relief at any time should a change in law, regulation or the terms of interconnection agreements materially affect the Telephone Company's reciprocal compensation obligations or the effective reciprocal compensation rate the Telephone Company is obligated to pay to CLECs.
