PSC NY No. 10--COMMUNICATIONS

Verizon New York Inc.   Section 5
                                                                    First Revised Page 87
                                                             Superseding Original Page 87

NETWORK ELEMENTS

5.   <u>Unbundled Network Elements</u> (Cont'd)
 5.6   <u>Unbundled Local Switching</u> (Cont'd)
  5.6.1   <u>Local Switch</u> (Cont'd)
   5.6.1.1 <u>Line Ports and Features</u> (Cont'd)
     (C)   <u>Line Port Features</u> (Cont'd)

<u>Centrex</u> (Cont'd)
<u>Six way Conference</u>
This option permits a station line user to establish a conference call consisting of more than three conferees (maximum six) without the assistance of the attendant.

<u>SMDR to Premises (DMS Only)</u>
This option provides a record of calls originated by station line users or incoming tie line groups directly to the customer provided equipment which collects and stores all data.

<u>SMDR to RAO (DMS Only)</u>
This option provides a record of calls originated by station line users or incoming tie line groups on a magnetic tape which is mailed to the customer on a monthly basis.

<u>Speed Dialing Long List</u>   (T)
This option permits a station line user to dial selected numbers by using fewer digits than are normally required. This is accomplished through the assignment of abbreviated codes to frequently called numbers, and is customer changeable.

<u>Three-way Calling</u>
This option permits a station line user to add a third party to an existing conversation.

<u>Tie Line Access</u>
This option permits a station line user to gain access to tie lines and leased channels.

<u>Time of Day Network Class of Service Routing</u>
This option provides the capability for mapping normal class of service (COS) values into new values based on the time of day (or day of week or year).

Issued: December 5, 2001   Effective: December 15, 2001
                        By Sandra Dilorio Thorn, General Counsel
