LOCAL EXCHANGE SERVICES

SECTION 15 - GRANDFATHERED SERVICES II, (Cont'd.)

15.5 Choice Path Product Set – Albany, Buffalo And Syracuse Markets

15.5.1 Choice Path Product Set

A. Basic Service

The Choice Path product set consists of voice and data services provided to the customer's location via a T-1 circuit.

Customers will have the option of selecting one of three types of T-1 circuits:

- Voice Only
- Data Only
- Integrated Voice & Data (both services on same T-1 circuit)

The Choice Path products are provided on a per channel basis (subject to certain minimums) for both voice and data services. Voice usage over a T-1 is rated on a per minute basis. Channels for data service will be provided at specific bandwidth amounts. If the customer needs the T-1 circuit provisioned as an ISDN PRI circuit, an additional charge for the circuit will apply.

The minimums for the different type of Path products are as follows:

- Voice Only: 15 channel minimum
- Integrated Voice and Data: 10 channel minimum (total of all voice and data channels)
- Data Only: no minimum number of channels
- ISDN PRI circuit: 23 B and 1D channel must be purchased (full circuit)

B. Choice Call Pack

Choice Path customers will need to select a local Choice Call Pack (refer to section 4.2.1.1 for description) for all voice channels on their T-1 circuit or usage will be rated at the standard rate indicated in Section 13; customers who choose Choice One Plus service may also choose a toll Choice Call Pack (refer to section 4.2.2.2 for description) for their Choice Path voice channels. Each channel within a service location must have the same usage plan. Minutes may be aggregated across all channels within the service location.
