ACCESS SERVICES TARIFF

SECTION 1 - TARIFF INFORMATION (CONT'D.)

1.3 Definitions, (Cont'd.)

Loss Deviation - The variation of actual loss from the designed value.

Major Fraction Thereof - Any period in excess of one-half of the stated amount of time.

Message - a call.

Milliwatt (102 Type) Test Line - An arrangement in an end office which provides a 1004 Hz tone at 0 dBm0 for one way transmission measurements towards the customer's premises from the Company end office.

Network Address - Numeric characters used to identify the originating or destination point of each virtual call within a packet network. The term network address is synonymous with data terminal number.

Network Control Signal - The transmission of signals used in telecommunications system which performs functions such as supervision (control, status and charge signals), addressing signaling, (e.g., dialing), calling and called number identifications, rate of flow, service selection error control and audible tone signals (call progress signals indicating reorder or busy conditions, alerting coin denominations, coin collect and coin return tones) to control digital cross connect.

Network Controller - The central computer system used with Network Reconfiguration service to control the reconfiguration of customer private line networks provisioned through digital cross connect system devices.

Network Controller Access - A method for the customer to access the centrally located network controller which provides customers with the management and control function for NRS.

Network Map - The complete configuration of a customer's frame relay port connections and permanent virtual circuits as defined by inter connectivity of network addresses and logical channels.

Nonrecurring Charges - A one time charge that applies for a specific work activity (i.e., installation or change to an existing service).
