Status: CANCELLED Received: 08/10/2012 Effective Date: 09/10/2012

CTC Communications Corp. d/b/a EarthLink Business PSC No. 3 - Telephone

Effective Date: September 10, 2012

Leaf 12 Revision: 0 Superseding Revision:

ACCESS SERVICES TARIFF

SECTION 1 - TARIFF INFORMATION (CONT'D.)

1.3 Definitions, (Cont'd.)

<u>Channel Service Unit (CSU)</u> - Equipment which performs one or more of the following functions: (a) termination of a digital signal; (b) regeneration of a digital signal; (c) detection and / or correction of signal format error and (d) remote loop back.

<u>Channelize</u> - the process of multiplexing - demultiplexing wider bandwidth or higher speed channels into narrower bandwidth or slower speed channels.

<u>C-Message Noise</u> - The C-Message Frequency weighted average noise within idle voice channel. The Frequency weighting, called C-Message is used to simulate the frequency characteristic of the 500-type telephone set and the hearing of the average subscriber.

<u>C-Notched Noise</u> - The C-Message Frequency weighted noise with a holing tone, which is removed at the measuring end through a notch (very narrow band) filter.

 $\underline{\text{Common Channel Signaling Access}} \text{ - The capability which allows customer access to the CompanySS7 signaling network.}$

<u>Common Line</u> - A line or trunk, pay telephone line or other facility provided under the general and / or local exchange service tariffs of the Company, terminated on a central office switch. A common line residence is a line or trunk provided under the residential regulations of the general and / or local exchange service tariffs. A common line business is a line provided under the business regulations of the general and / or local exchange service tariffs.

<u>Communications System</u> - Channels and other facilities which are capable of communications between terminal equipment provided by other that the Company.

<u>Conversation Minutes</u> - The measurement of minutes beginning when either answer supervision or an off-hook supervisory signal is received from terminating end-user's end office and ending when either disconnect supervision or an on hook supervisory signal is received from the terminating end-user's office, indicating the called party has disconnected.
