ACCESS SERVICES TARIFF

SECTION 6 - SWITCHED ACCESS SERVICE (CONT'D.)

6.2 Functional Components of Service (Cont'd.)

6.2.2 Local Transport (Cont'd.)

E. Local Transport Rate Category (Cont'd.)

4. (Continued)

(c) **Local Transport Tandem Switching** provides for the use of the Company tandem switching facilities. An operator pass-through charge and multiplexer charge will apply as appropriate.

5. Operator Access - If the customer provides operator services for end users for calls originating from a particular LATA and is capable of receiving calls passed through to it by the Company in that LATA, the Company will provide end users with access to the operators of a customer for operator assisted call completion as desired. The customer will be assessed an operator pass-through charge that will include the costs associated with handling the operator services pass-through

(a) If the customer does not provide operator services for end users, at the option of the customer, the Company will provide end users with access to a customer designated operator services provider or to a Company provided announcement which will direct the end user to contact his or her pre-subscribed Interexchange Carrier for dialing instructions. For customers who opt to designate an operator services provider, only one operator service provider may be designated within a specific LATA. In either case, the operator pass-through charge will be assessed. However, when an operator services provider is designated by the customer to handle this traffic, the operator pass-through charge will be assessed on the operator services provider instead of the customer.
