ACCESS SERVICES TARIFF

---

SECTION 6 - SWITCHED ACCESS SERVICE (CONT'D.)

6.2 Functional Components of Service (Cont'd.)

6.2.6 Local Switching Optional Features - WAL Service Terminations

A. WAL Service Terminations

WAL Service Terminations are available only on end offices designated as WSOs.

1. Answer Supervision provides for equipment at the end user premises that indicates that the called end user has answered, when such indication is provided by the interexchange carrier. When answer supervision is provided with two-wire WAL service, reverse battery-type supervision is also provided. This option is available with originating only two-wire WAL service for use with FGB and FGD.
2. E&M Supervisory Signaling - provides for E&M Type 1, Type 2, or Type 3 supervisory signaling in lieu of loop start or ground start supervisory signaling. When E&M supervisory signaling is provided, answer supervision is also provided for originating traffic. This option is available with four-wire originating, terminating and two-way only WAL service, for use with FGB and FGD.
