COMPETITIVE TELECOMMUNICATIONS SERVICE TARIFF

SECTION 9 - INTERIM NUMBER PORTABILITY (CONT'D.)

9.6 Rates and Charges

9.6.1 Remote Call Forwarding Option

To compensate for additional switching and transport costs, the Company will establish an annual charge on all working telephone numbers provided by the Company. The charge will be payable by the Co-Carrier providing end-user service on that number. The annual charge will be assessed in December of each year.

The annual charge billed to the Co-Carrier will be calculated and applied as follows:

$$(\text{TPM} \times \text{STC}) / \text{TNs} = \text{Charge Per TN}$$

$$\text{Charge Per TN} \times \text{NPU} = \text{Charge per Co-Carrier}$$

Where:

TPM is Total Ported Minutes

STC is Switching and Transport Charges

TN is Working Telephone Number Provided by The Company

NPU is Number of Ported TNs Used by the Co-Carrier
