INTEREXCHANGE TELECOMMUNICATIONS TARIFF

SECTION 3 - DESCRIPTION OF SERVICE (CONT'D.)

3.6   Enhanced Toll Free Services (Cont'd.)

3.6.4   Toll Free with DNIS Delivery

This feature permits a dedicated Inbound 800 subscriber with multiple toll free numbers terminating in the same location to identify the specific toll free number dialed by the calling party. Both installation and change charges apply. Change charges apply for subsequent changes in routing, after the initial service has been installed.

3.6.5   Toll Free with Real Time ANI Delivery

Real time automatic number identification (ANI) service is a dedicated inbound 800 feature which identifies the calling party's telephone number to the Inbound 800 subscriber, provided the terminating subscriber's Inbound 800 equipment is appropriately equipped and compatible to receive ANI from the company. A per call delivered charge is assessed for Real Time ANI delivery. Change charges apply for each subsequent change to the initial service installation.

3.6.6   Toll Free with Menu-Prompted Routing

This feature permits the Inbound 800 subscriber to route calls based on the number dialed by the caller. Menu-Prompted Routing is a network-based voice response system that instructs the call to dial a key to be directed to the location of choice. The audio message that provided caller instructions are customizable. The subscriber can create up to three levels of voice response processing. Both installation and monthly recurring charges apply. Change charges apply for each subsequent change to the initial service installation.
