SECTION 3 - DESCRIPTION OF SERVICE (CONT'D.)

3.6 Enhanced Toll Free Services (Cont'd.)

3.6.1 Enhanced Toll Free Routing Package (Cont'd.)

F. Percent Allocation

This feature permits the Inbound 800 subscriber to arrange for calls to a single toll free number to route various percentages of calls to two or more locations. The subscriber must establish a call allocation pattern where each percentage is a whole number and the total allocation equals 100 percent. The monthly recurring and installation charge apply per toll free number. Change charges apply for each subsequent change request in routing.

3.6.2 Toll Free with Call Completion

This feature permits the Inbound 800 subscriber to play pre-recorded audio messages to callers informing them of specific business conditions. The subscriber has four pre-recorded audio messages to choose from. The installation charge and monthly recurring charge applies to these pre-recorded messages. Customization of these audio messages (including foreign languages) will incur an additional Customized Announcement Creation installation charge.

3.6.3 Toll Free with Route Advance

This feature permits the dedicated Inbound 800 subscriber to control potential congestion of toll free calls by sending the overflow calls from one dedicated line to a switched line or from one dedicated line to another dedicated line, allowing for maximum completion of incoming toll free calls. The subscriber can route advance a call to a maximum of five alternate locations. Installation, monthly recurring and change charge apply.
