
INTEREXCHANGE TELECOMMUNICATIONS TARIFF

SECTION 3 - DESCRIPTION OF SERVICE (CONT'D.)

3.2 Timing of Calls (Cont'd.)

3.2.1 Computation of Charges

For the computation of charges, the duration of each call is measured and rounded up to the applicable billing increment, then multiplied by the applicable rate and if the computed charge for any individual call results in a fraction of a cent, the fraction is then rounded up to the next whole cent on a per call basis. For example, a service may provide that each call will be charged a minimum of 18 seconds and thereafter timed in 6-second increments; therefore, under this example, a 10-second call will be rounded up to 18 seconds (\$0.3 minutes), and a 44-second call will be rounded up to 48 seconds (\$0.8 minutes). If, after multiplying the billing increment by the applicable rate, the computed charge for an individual call results in a fraction of a cent, the fraction is rounded up to the next whole cent (for example, \$1.523 would round up to \$1.53). Once the charge for each call is computed as described above, the calls are summed on the Customer's invoice.

There is no billing applied for incomplete calls.

3.2.2 Rate Periods

A. Time-of-Day Rate Periods

The appropriate rates apply for day, evening and night/weekend calls based on the following chart.

Times	Mon	Tues	Wed	Thur	Fri	Sat	Sun
8:00 am to 5:00 pm	Daytime Period						
5:00 pm to 11:00 pm	Evening Period						Eve.
11:00 pm to 8:00 am	Night/Weekend Period
