SECTION 2 - EXCHANGE SERVICES (CONT'D.)

2.15 Advanced Toll free Service

2.15 1 General

Advanced Toll free Service permits inward calling, without charge to the caller, to a telephone number associated with the Subscriber's existing local exchange service. Advanced Toll free Service offers an alternative to Basic Toll free service which requires a dedicated access line separate from a Subscriber's existing local exchange line. Calls originate from any interstate or intrastate location over a toll free (800/888) number and terminate to a Customer-provided switched access line. Call charges are billed to the Subscriber rather than to the originating caller. Since interLATA calls cannot be prevented from reaching an toll free service number, the Subscriber must also subscribe to an interLATA toll free service or similar service provided by an interexchange carrier.

Toll free service does not include person to person, collect, conference or other calls requiring operator handling. Service may be furnished only when and for so long as the Customer subscribes to a sufficient number of access lines to adequately handle the volume of telephone calls received, without interfering with any of the services offered by the Company.

The minimum service period is one month.

Service is furnished by the Company at rates based on the accumulated time per month. Accumulated time is based on a minimum charge of fifteen (15) seconds per call. Time is charged to the Subscriber in hours and/or tenths of an hour. any fraction of usage that is over one-tenth of an hour is rounded to the next one-tenth hour and one-tenth of the hourly rate applies.

A connection charge applies to each access line.
