SECTION 4 - DIGITAL DATA SERVICE (CONT'D.)

4.6 ISDN Basic Service and Virtual Serving Arrangement – General (Cont'd.)

4.6.1 Service Description, (Cont'd.)

D. Optional Features

The following features are available with ISDN Basic Service.

1. Digital Electronic Telephone Service (DETS) - Is comprised of several features which provide Customers with the functionality of a key system, from the central office, thereby eliminating the need for controlling equipment and complex wiring on the Customer premises. ISDN terminals must be obtained independently by Subscribers. The features included are:
 - a. Configuration Groups - Allow a number of ISDN terminals to have identical assignment of button functions on the ISDN terminals. Some predefined standard configuration groups are provided with DETS. The Customer has the option of ordering non-standard configuration groups at an additional charge as specified in the rates and charges section following.
 - b. Feature Access - Provides use of optional features via button/key assignments or feature access codes.
 - c. Multiple Directory Numbers - Allow for more than one directory number to be assigned to call appearances on a single ISDN terminal for the exclusive use of that ISDN terminal. One directory number will be specified as the primary directory number.
